 - b. Core Catalog Materials

1. INTRODUCTION:

The documentation for this data set was originally on paper, kept in NSSDC's Data Set Catalogs (DSCs). The paper documentation in the Data Set Catalogs have been made into digital images, and then collected into a single PDF file for each Data Set Catalog. The inventory information in these DSCs is current as of July 1, 2004. This inventory information is now no longer maintained in the DSCs, but is now managed in the inventory part of the NSSDC information system. The information existing in the DSCs is now not needed for locating the data files, but we did not remove that inventory information.

The offline tape datasets have now been migrated from the original magnetic tape to Archival Information Packages (AIP's).

A prior restoration may have been done on data sets, if a requestor of this data set has questions; they should send an inquiry to the request office to see if additional information exists.

2. ERRATA/CHANGE LOG:

NOTE: Changes are made in a text box, and will show up that way when displayed on screen with a PDF reader.

When printing, special settings may be required to make the text box appear on the printed output.

EPE-D

L-ORDERED PARTICLE CNT RATE TAPES

64-086A-02A

This data set has been restored. There were originally 2 7-track, 556 BPI tapes written in BCD. There is 1 restored tape. The DR tape is a 3480 cartridge and the DS tape is 9-track, 6250 BPI written in ASCII. The tape was created on a 7094 computer. The DR and DS numbers along with the corresponding D numbers are as follows:

DR#	DS#	D#	FILES
DR03497	DS03497	D04866	1
		D04867	2

64-086A-02A

This data set consists of two 556 BPI, 7-track, BCD tapes with one file on each tape. The tapes are not ordered by time, but they are L-ordered. There are 10 logical records per physical record and each logical record is 144 characters long.

<u>D#</u>	<u>C#</u>	<u>FILES</u>	
D-04866	C-02430	1	L = 1,150 - 3,200
D-04867	C-02431	1	L = 2,45 - 7,000
