

Figure 1 displays 11 time series plots stacked vertically, showing data over a 24-hour period. The x-axis is labeled 'hours' and ranges from 0 to 24. The y-axis for each plot has a scale from 0 to 6. The channels are labeled on the left: CH1, CH2, CH3, CH4, CH5, CH6, CH7, STP, SC, TO, and RES. The top seven channels (CH1-CH7) show a noisy baseline that transitions into a structured pattern with peaks and troughs around 14-16 hours. The bottom four channels (STP, SC, TO, RES) show a similar transition, with the STP channel exhibiting a sharp peak around 14 hours and the SC, TO, and RES channels showing a sharp drop around 14 hours.
